DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker (EP 0425072).

3. In regards to **Claim 1**, Baker discloses a method of preloading a tapered roller bearing B secured with a conical seat on a tapering roll neck 4 of a roll 2, in particular, a back-up roll, arranged in a roll stand by means of a chock C, by application of a hydraulic pressure 88, 90 thereto, characterized in that the bearing inner ring 32, rollers 36, and the bearing outer ring 34 of the tapered roller bearing B are subjected to pressure produced during rolling and are radially preloaded against the roll 2 (Fig. 3).

4. In regards to **Claim 2**, Baker discloses that the tapered roller bearing B is preloaded with a pre-set hydraulic pressure (Col. 8, lines 23-27).

5. In regards to **Claim 3**, Baker discloses that the tapered roller bearing B is preloaded in a controlled manner dependent on the rolling force (Col. 7, lines 50-54).

Allowable Subject Matter

6. Claims 4-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or make obvious the limitation of an annular pressure applying device supported on the roll by an axial bearing provided on the roll end neck.
